

Scope Statements for ADU Benchmark Domains

Domain 1: Strategy Policy and Governance

The ADU actively contributes to the governance of learning and teaching. This may include contributions to strategic planning, policy, and initiatives.

Domain 2: Quality of Learning and Teaching

The ADU actively contributes to assuring and enhancing the quality of learning and teaching. This may include contributing to the evaluation and improvement of teaching through student feedback, peer review and curriculum review.

Domain 3: Scholarship of Learning and Teaching

The ADU actively contributes to the scholarship of learning and teaching. It does this through initiating and/or participating in grants and awards, research and scholarly investigation of learning and teaching.

Domain 4: Professional Development

The ADU actively contributes to the professional development of all staff who contribute to learning and teaching. This includes the effective planning, management and delivery of programs and services associated with professional development.

Domain 5: Credit-bearing Programs in Higher Education

The ADU actively contributes to the effective planning, management and delivery of credit-bearing programs in higher education.

Domain 6: Curriculum Development

The ADU actively supports curriculum planning and design and the development of educational resources.

Domain 7: Engagement

The ADU actively communicates with and engages the university's communities in the development of learning and teaching.

Domain 8: ADU Effectiveness

The ADU actively monitors the effectiveness of its operations and the domains of practice in which it engages in supporting learning and teaching.
